

Student Expenses Tracking System

Problem Statement

Many students do not track daily expenses properly, which leads to poor budgeting and financial stress. This system helps students record, analyze, and manage expenses efficiently.

Objectives

- Track daily student expenses
- Categorize spending
- Analyze monthly expenses
- Help students stay within budget

Scope of the Project

- Student login & signup
- Add, edit, delete expenses
- Expense visualization (charts)
- Monthly & category-wise summary

Technology Stack

Backend: Django (Python)
Frontend: HTML, CSS, JavaScript, Bootstrap
Database: SQLite
Charts: Chart.js

System Architecture

User → Web Interface → Django Backend → Database

Functional Requirements

- User registration & authentication
- Add expense details
- View expense history
- Monthly summary
- Budget limit alerts

Non-Functional Requirements

- User-friendly interface
- Secure authentication
- Fast performance
- Scalable system

Future Enhancements

- Mobile application
- AI-based expense prediction
- Export reports (PDF/Excel)

Conclusion

The Student Expenses Tracking System helps students manage finances effectively and develop better financial discipline.
